WELCOME MESSAGES

WELCOME MESSAGE FROM THE GOVERNING MAYOR OF BERLIN

I would like to extend a very warm welcome to everyone here in Berlin for the 24th International Congress of The Transplantation Society. I am delighted that you have chosen Germany's capital city as the venue for this important international congress.

Transplant medicine has made remarkable advances in recent years. A wide range of medical and technological innovations have helped to refine individual transplantation procedures, develop new ones, and keep success rates rising. All of this has meant new hope for many critically ill patients. However, the shortage of donor organs remains an enormous problem, and one that calls for both political and medical solutions. Germany's parliament only recently passed legislation that makes comprehensive changes to the rules on organ donation. These are designed to promote public acceptance and thereby raise the number of donors.

However, it is also vital that research in the area of transplant medicine continue to be stepped up. International exchange is playing a growing role in pursuit of that goal.

Berlin is honored to be hosting this year's International Congress of The Transplantation Society, a conference that brings international experts together to discuss both medical/scientific and ethical issues related to transplant medicine.

As a renowned center of science and learning and home to a cutting-edge life sciences sector, Germany's capital city offers ideal conditions for a successful and productive conference. The same is true of all aspects of your discipline, ranging from the German Heart Institute Berlin (DHZB), for instance, to the Charité's highly regarded transplantation centers at its Mitte campus and Benjamin Franklin campus and the clinic for General, Visceral, and Transplant Surgery at the Virchow campus, headed by Professor Peter Neuhaus, who is your congress chair this year.

With all this in mind, I would again like to welcome you to Berlin and to wish you both a productive and interesting exchange and, for our visitors from outside the city, a very pleasant stay and fresh inspiration when you return home.

A handwritten signature in black ink, which appears to read 'Klaus Wowereit'.

WELCOME MESSAGES

WELCOME MESSAGE FROM THE CONGRESS CHAIRS

Dear Colleagues,

It is our great pleasure to welcome you to the 24th International Congress of The Transplantation Society in Berlin, Germany from July 15th – 19th, 2012.

Following the exceptionally successful meetings in Boston, Sydney and Vancouver, we welcome you to a city which, twenty years after reunification has evolved into one of the most important capitals of Europe. Once the capital of Prussia and leading cultural center of the 1920s, today the new capital of Germany is characterized by its dazzling modernity and breathtaking architecture. Berlin is young, dynamic and bursting with joie de vivre. Few cities have been shaped to such an extent by history and undergone as much major transformation as Berlin. "Berlin is always in the process of becoming", remarked historian Karl Scheffler. The same is true for transplantation. It is still evolving even though we are already in the 21st century. Therefore, the 24th International Congress of The Transplantation Society will promote the dialogue of experts

from around the world. An attractive scientific program has been developed together with the Deutsche Transplantationsgesellschaft.

The 24th Congress is designed for physicians, surgeons, scientists and organ procurement personnel, who are interested in clinical and scientific aspects of solid organ, cell and tissue transplantation. The program is developed to encourage the exchange of latest scientific and clinical information, and support an interchange of opinions regarding care and management issues, as well as socioeconomic, ethical and regulatory issues relevant to transplantation.

We therefore cordially invite you and your colleagues together with your friends and family to experience Berlin. Your active participation in the scientific program will be the fundament for a successful event in 2012.

With warmest regards,

Peter Neuhaus
Chair of the 24th International Congress
of The Transplantation Society

Wolf Otto Bechstein
Co-Chair of the 24th International Congress
of The Transplantation Society

SOCIETY INFORMATION

TTS – THE TRANSPLANTATION SOCIETY

The Transplantation Society is the premier international organization for the worldwide advancement of transplantation, which provides the focus for global leadership in this field through:

- development of science and clinical practice
- scientific communication
- continuing education
- guidance on ethical practice

SOCIETY INFORMATION

DTG – DEUTSCHE TRANSPLANTATIONSGESELLSCHAFT

The German Transplantation Society (Deutsche Transplantationsgesellschaft, DTG) is a national organization of transplant professionals which is dedicated to the improvement of patient care by fostering clinical and basic research as well as education and advocacy in transplantation and organ donation. The Society was founded in 1992 and is an organization of about 700 members from all fields of transplantation medicine. The Society represents all Transplantation centers in Germany which are accredited according to the German Transplantation Law. The Executive Board of the German Transplantation Society consists of the President, the President-Elect, the General Secretary, the Treasurer, and the Secretary. The profile of the society is reflected by the different Committees:

- kidney
- liver-intestine
- pancreas
- thoracic-organs
- tissue and cell transplantation
- organ donation and retrieval
- ethics
- psychosomatic medicine
- immunology

The respective members of the Committees are representing surgery, internal medicine, urology, anaesthesia, immunology, and transplant coordination. The Speakers of the committees are members of the Extended Board. A Scientific Council of the German Transplantation Society is dedicated to the progress of experimental and clinical transplantation, surgical techniques, immunology, clinical immunosuppression, tissue typing, and xenotransplantation. The Executive Board of the German Transplantation Society and the Scientific Council are responsible for the high quality of the annual meeting of the society concerning abstract reviewing and program organisation. The German Transplantation Society maintains an exchange with the German Foundation of Organ Donation (DSO), with Eurotransplant (ET) responsible for organ allocation, with the German Medical Association (Bundesärztekammer) and with patient organisations as well as with many international transplant societies. Delegates work in different commissions to adapt allocation policies for Germany and to both support and harmonize the network within ET. In particular a close cooperation with the European Society of Organ Transplantation (ESOT) has been established also reflected by the selection of *Transplant International* as official journal of the Society. To enhance transplant associated science, the Society established annual competition for awards and grants. Furthermore, to booster the younger investigators and clinicians both grants and educational courses are offered.

CONGRESS VENUE

The International Congress Centre Berlin (ICC Berlin) ranks among the biggest, most advanced and most successful congress venues in the world. It was built in just four years under the watchful eyes of architects Ralf Schüler and Ursulina Schüler-Witte. Since its opening the highly versatile communication complex – 320 metres long, 80 metres wide and 40 metres high – is one of the most outstanding landmarks of post war German architecture and the model for many new congress centres all over the world. With its 80 halls and rooms seating between 20 and 9000, the ICC Berlin is the perfect choice for any convention.

OPENING CEREMONY AND WELCOME RECEPTION

The Opening Ceremony will take place in the ICC on July 15, 2012 at 6 pm. All participants are invited to join the Welcome Reception in the Exhibition Area after the Opening Ceremony. Enjoy a glass of wine and meet colleagues from all over the world.

CULTURAL EVENING

**Cultural evening – Private Visit to Neues Museum and Pergamon Museum
Tuesday, July 17, 2012, 18:30 – 22:30 h
Starting point at Museumsinsel (Museum Island)**

The Museumsinsel – a UNESCO World Heritage and a one-of-a-kind cultural institution attracting several million tourists each year. On July 17, 2012 it will open the doors of two of its most interesting museums **for TTS Congress delegates only**. Visit the Neues Museum, an institution with a history as rich as the one of the Museumsinsel itself. Having been closed for almost seven decades it was finally revived by the British architect David Chipperfield, who succeeded in uniting its old glory with modern elements. As a highlight, have a look at one of the most graceful pieces of art worldwide: the bust of Nefertiti. The Pergamon Museum, which will also be open, is one of Germany's most successful art museums. It houses some of the most impressive original-sized monumental buildings of the Middle East, among them the Pergamon Altar. You can tailor your own tour through the two museums, arriving and leaving at any time between 18:30 h and 22:30 h. During this time, guides will be present and happy to answer any questions you might have.

Price per person 30,00 €

Including Entrance to both museums, English-speaking guides

GALA EVENT

Gala Event at Kulturbrauerei

Wednesday, July 18, 2012, 19:30 – 23:00 h (Open End in the Soda Club)

The Kulturbrauerei is a melting pot par exemple. It fuses Berlin's cultures, its manifold nationalities, its varieties, its extremes. Nothing could be better a venue for a social evening than this setting. In the course of the 24th International Congress of The Transplantation Society, 5.000 attendees from all over the world will get the opportunity to network in a one-of-a-kind situation. True to the motto «Varicoloured Berlin», diverse artists will attract, entertain and animate the guests of the evening: from majestic 5-meter high swinging poles to alternative dance music, from a classy swing band to Eastern European sounds (Polka, Klezmer) pumped up with hot southern sounds (Ska, Cumbia). The participants can explore the many rooms and courtyards of the former brewery building, get in touch with each other, enjoy the music or get swept away by the multifaceted impressions. Culinary-wise, the guests will find themselves on a journey to the countless nations that find a second home in Berlin. In July 2012, the Kulturbrauerei welcomes, links and unites the world.

Please note, that the Kulturbrauerei is a historic venue with cobble stone pavement. We would therefore highly recommend to wear comfortable shoes.

The Berlin Wall – Attempts to Escape

Wednesday, July 18, 2012, 09:30 – 12:30 h

Meeting point Hotel Park Inn Alexanderplatz main entrance, at 09:30 h

In 2009 Berlin celebrated the 20th anniversary of the Fall of the Wall. In the summer of 1961 the East German government ordered the erection of the Berlin Wall. Since then, many attempts were made to dig tunnels through Berlin's sandy soil in order to overcome the heavily guarded border. Sometimes this led to spectacular cloak-and-dagger operations, other times to betrayal and bitter failure. Enjoy an interesting tour and learn more about the escapes from Berlin to Berlin. See various photo exhibitions and visit the Bernauer Straße. More than seven escape tunnels were attempted within a distance of just 350 meters of each other. Here you will hear tales of betrayal in addition to the story of the two most successful tunnels.

MEMORY LANE

Memory Lane is a picture gallery displaying pictures and information from past TTS Congresses. Memory Lane is located on the Foyer Hall walking towards the Exhibits. Many people involved in Transplantation can tell you where each biennial congress of The Transplantation Society was held – here is your chance to test the truth of their assertions! We have collected together items from each congress to remind those who attended them. The older congresses are less well represented so if you are a hoarder of old memorabilia and would like to offload them somewhere usefully then please leave them with us at the TTS stand or inform our TTS International Headquarter office (info@tts.org). Where were we meeting in 1998? When did it rain on the evening gala dinner? Which year saw the President dressed as a Samuri warrior? When were the delegates at risk of shark bite?

CME ACCREDITATION

CME ACCREDITATION

Physicians

The Transplantation Society (TTS) is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

AMA PRA STATEMENT

TTS designates this educational activity for a maximum of 48.75 AMA PRA Category 1 Credit(s)[™] (12.75 hours for the Post Graduate Weekend and 36.00 hours for the Congress). Physicians should claim only the credit commensurate with the extent of their participation in the activity.

HOW TO GET YOUR CME CERTIFICATE

To get your certificate, just go to www.CmeCertificateOnline.com

IMPORTANT!

The online certificate site will only be available through Sept 30, 2012. After that date, the site will be removed and certificates will no longer be available. If you need a CME certificate, you **must** complete the evaluation and certificate process prior to that date otherwise you will forfeit your credit for the course.

Scroll down to the TTS logo on the left side of the screen and click on 24th International Congress of The Transplantation Society on the right side. On the site, you will be asked to enter a password (which is: TTS2012Congress) and evaluate various aspects of the program. You may then print your certificate **immediately** (encouraged), anywhere you have internet access. No more waiting for the mail! A copy of the certificate will also be emailed to you in case you need to print additional copies (check your spam filter and junk e-mail folder if you do not see it come through). The e-mail copy is simply a backup in case you didn't print it right away.

Please address any questions about the CE process to:

Phone +1 651 – 78 93 71-1

E-mail kmyvett@smithbucklin.com

All Social/Cultural Events, Printed Posters, ePosters, Presentations in the Mini-Theatres and Industry Supported Symposia do not qualify for CME accreditation.

Science Circus II includes Mini-Theatres 6 – 10.

Please see the program pages for detailed information.

POSTER EXHIBITION

Selected abstracts are presented as printed Posters in Hall Stockholm, located on Level 1. Please see the additional Poster Book for detailed information.

The Poster Exhibition is kindly supported by

ePOSTERS

All abstracts selected as posters will be presented as ePosters. These are accessible through iPad stations in Science Circuses I & II.

INDUSTRY SUPPORTED SYMPOSIA

From Sunday through Wednesday, several Industry Supported Symposia will take place, which are offered to congress attendees free of charge. You are encouraged to attend these symposia as topics have been chosen after consultation with the Scientific Committee.

The symposia will take place in Hall 3 and in the Funkturm Lounge, for detailed information please see the program pages.

TRANSPLANTATION JOURNAL

Special Issue of *Transplantation* dedicated to the 24th Congress of The Transplantation Society

The Transplantation journal is pleased to announce that once again they have invited the highest scoring oral abstracts for possible publication in a SPECIAL issue. The manuscripts will be processed in the normal way and will, of course, be peer reviewed and if accepted will be published in a special issue of Transplantation dedicated to the Berlin Congress. This issue will include additional materials such as the address from the President of The Transplantation Society, and the Medawar Prize winner. Invitations were already sent out in May to the according authors.

BERLIN INFORMATION

ABOUT BERLIN

Since the fall of the Berlin Wall in 1989 the German capital has grown to an unequalled metropolis of tradition and modern spirit, culture and science. With its famous sights such as the Reichstag and Potsdamer Platz, Tiergarten and Wannsee, Brandenburger Tor and the famous Radio Tower, Ku'Damm, Charité and the International Congress Centre – the city of Berlin offers a special venue for every visitor and every occasion. Being the number one congress site in Germany, the city of Berlin has a high reputation in the scientific world – not only in Germany itself, but also far beyond the borders. The daily connections from Berlins' airports to cities all over the world, the high-class infrastructure and the remarkable high security standards in combination with its extensive cultural events and vibrant night life attracts millions of tourists each year. Berlin is also known as the gateway to Eastern Europe. In the last twenty years, Berlin with its variety of cultural sights from the city centre to the close-by Potsdam/Sanssouci, the wide range of different museums and theatres and – last but not least – its beachbars, parks and nightclubs, evolved into Germany's metropolis.

The Story of the Buddy Bears

«We have to get to know each other better it makes us understand one another better, trust each other more, and live together more peacefully». Under this motto, the United Buddy Bears promote living together in peace and harmony on their global tour. About 140 Buddy Bears (each 2 m tall) represent as many countries as recognised by the United Nations. Each Buddy Bear shows the individual design created by different artists on behalf of their native countries. The diverse design enables the visitors to experience a journey around the globe. So far, over Euro 1,884,000* have been raised with Buddy Bear activities in aid of UNICEF and many local children's relief organisations through donations and auctions. BASIC SCIENCE MENTEE/MENTOR AWARDS

Mentee-Mentor Travel Awards

The Basic Science Mentee-Mentor award recognizes the efforts of established basic scientists, who have advanced our understanding of transplantation biology and the treatment of transplant recipients, as well as the mentorship of new young investigators who will advance transplantation in the future. We are pleased to announce the partnership between The Transplantation Society (TTS) and 7 National and International Transplantation Societies to support 27 Mentee-Mentor Award recipients for the 24th International Congress of The Transplantation Society. Congratulations to the 2012 Award Recipients!

The Award Ceremony will take place at the Basic Science Networking Event (Tuesday, July 17, 2012, 17:30 – 19:00 h Room Oslo)

Glycotope Biotechnology: Monitoring CMV-specific T cells with Tetramers

Glycotope Biotechnology's product line of diagnostic reagent kits is based on flow cytometry procedures for the fast and precise measurement of various cell functions. Our focus is the functional characterization of the cellular immune response. The kits are designed as ready-to-use reagent kits in clinical routine.

CMV remains an important complication after allogeneic stem cell transfer and after organ transplantation. Current assays based on PCR and antigen-detection are capable to analyse the viral burden, however, any immunoreactivity against CMV cannot be assessed.

We have developed a CMV Kit that allows enumeration of CMV specific T cells with Tetramers in a small sample of full blood. Several studies with tetramers have firmly established the presence of CMV-specific T cells in the blood of patients as the best marker for protection against CMV disease.

Immunological monitoring with tetramers after SCT and organ transplantation might yield important information for patient management.

LEARNING OBJECTIVES

PROGRAM OBJECTIVES

Improving Standards in Transplantation – Techniques, Protocols and Outcome

After the meeting the delegates will be able to:

- Discuss the outcome after solid organ, cell and bone marrow transplantation
- List treatment options of viral, bacterial and fungal infections after transplantation

Organ Scarcity – Marginal Organs, New Approaches & Alternatives

At the conclusion of this meeting participants will be able to:

- Name new strategies of organ procurement, preconditioning and transport of marginal organs
- Review the latest results of preclinical and clinical studies in regenerative medicine

Immunosuppression – Long-Term Effects, Tailored Therapy, Tolerance

At the conclusion of this meeting participants will be able to:

- Name the risk profiles of current immunosuppressive regimens
- Develop immunosuppressive strategies to improve organ and patient survival

Psychological and Ethical Challenges – Composite Tissue Transplantation, Living Donation and Donation after Cardiac Death

At the conclusion of this meeting participants will be able to:

- Discuss ethical and medico-legal aspects of allocation policies
- Explain philosophical/religious aspects of organ donation

PROGRAM FEATURES:

- Comprehensive Postgraduate Weekend
- Sunrise Symposia and structured courses
- State-of-the-Art Symposia
- Scientific Workshops and specialist seminars
- Individual thematic scientific presentations
- Satellite symposia

Sunday, July 15, 2012

Hall 3

13:30 – 17:00 h

Astellas Satellite Symposium

Difficult Donor Issues in the Time of Organ Shortages

The Astellas-sponsored symposium will examine pertinent and controversial issues in renal transplantation. An eminent panel of experts will provide an in-depth exploration of donor-related challenges faced by clinicians as the shortage of organs continues. This interactive symposium will focus on both deceased donors and living donors, with case studies and opportunities for practical discussions with the expert panel.

Monday, July 16, 2012

Funkturn Lounge

10:30 – 12:00 h

Dr. F. Köhler Chemie Symposium

New Trends In Organ And Tissue Preservation

This symposium will explore the trends and developments of conservation solutions provided by Dr. F. Köhler Chemie GmbH. An international panel of experts will discuss current aspects of the preservation of solid organs, blood vessels, and composite tissue. The lectures will emphasise on some of the most challenging issues facing transplant surgeons: How to improve the preservation of organs?

Monday, July 16, 2012

Hall 3

12:00 – 13:30 h

Bristol-Myers Squibb Lunch Symposium

Challenges in Achieving Optimal Immunosuppression

Program Summary:

This lecture and panel discussion will highlight the challenges associated with the current immunosuppressive regimens for kidney transplant recipients. The program will review outcomes of strategies to improve post-transplant immunosuppression, with a focus on novel agents, including the recently approved belatacept. Challenges related to antibody-mediated graft injury will be discussed.

SPONSORED SYMPOSIA

Monday, July 16, 2012

Hall 3

17:30 – 19:00 h

Pfizer Symposium

Managing Risk and Improving Outcomes in Renal Transplantation

This symposium will review the latest data on the use of mTOR-inhibitors in renal transplantation. The presentations and discussion will consider how to optimize the clinical utility of these agents as well as the potential non-immunosuppressive benefits which may accrue, such as reducing cancer risk.

Tuesday, July 17, 2012

Hall 3

12:00 – 13:30 h

Astellas Lunch Symposium

Encouraging long-term Success in Organ Transplantation – the Complex Role of Immunosuppressants

A range of factors have an impact on the long-term success of organ transplantation, from donor and recipient profiles through to the ongoing influence of acute and chronic rejection.

This symposium, sponsored and developed by Astellas and chaired by Professor Gerhard Opelz (University of Heidelberg, Germany), will examine the complex role of immunosuppression in relation to these factors, and will include discussion and debate on:

- Real-life transplant populations and successful risk management
- Renal failure in solid organ transplantation and the true impact of 'CNI nephrotoxicity' on graft loss
- Current challenges and future priorities in kidney and liver transplantation.

SPONSORED SYMPOSIA

Tuesday, July 17, 2012

Hall 3

17:00 – 18:30 h

One Lambda Symposium

The Humoral Theory of Rejection 2.0: New Paradigms in Understanding Donor Specific Antibody and Rejection

Symposium Synopsis

Donor specific anti-HLA antibodies (DSA) are widely accepted as the major barrier to long term graft survival. Please join us as our prominent panel of speakers discusses new approaches to assessing risk and identifying clinically relevant antibodies. Topics to be discussed include: the identification of complement fixing DSA with a novel C1q solid phase assay, chronic rejection as an autoantibody mediated event, and non-HLA/autoantibodies and their impact on graft survival. The presentations will offer new concepts and provide additional perspective on the important topics of antibody mediated rejection and long term outcome.

Wednesday, July 18, 2012

Hall 3

12:00 – 13:30 h

Novartis Lunch Symposium

Protecting Renal Function in Solid Organ Transplantation: A 21st Century Perspective
Learning from Liver Studies

Top international faculty will be presenting data on long-term outcomes in liver transplantation.

MEMBER BENEFITS

- The opportunity to be part of the **leading global network** of physicians, surgeons and basic scientists involved in transplantation, representing 88 countries around the world.
- Entitlement for **travel grants** for Young Investigator Awards.
- **Reduced registration fees** at our international congresses and section meetings. For example, a reduction of €300 is being offered at the Berlin 2012 Congress while the annual membership costs \$80, a savings of €240.
- Voting and **nomination rights** for the election of TTS Officers and Councillors (Full members only).
- **TTS newsletter "Tribune"** updating members about TTS activities in the transplant community.
- Members from **emerging market economy** nations are entitled to a 50% rebate on TTS dues which may be combined with TTS rebate for section dues.
- **Substantially reduced rates** for journal subscriptions, including the journal **"Transplantation"**, the official journal of The Transplantation Society.
- Free access to **live webinars** (minimum 12 per year).
- Free access to educational material on the Society's website, including over **3000+ multimedia presentations**.

Apply online today – www.tts.org

JOIN TTS TODAY ...and become part of a growing organization focused on the entire global transplant community.

“By joining TTS, there is no better way to invest in your career and in one of the most dynamic professions in medical science today.”

Members will have access to recorded presentations from the TTS Berlin 2012 Congress!

PROGRAM OVERVIEW

EVEN IN TRANSPLANTATION,
CERTAIN THINGS
SHOULDN'T
BE REPLACED

CellCept®
mycophenolate mofetil
Trust what you know

Please consult the Summary of Product Characteristics before prescribing, particularly in relation to side-effects, precautions and contra-indications. Full prescribing information is available upon request from: Roche Pharma AG, Emil-Barell-Strasse 1, Grenzach-Wyhlen, 79639, Germany.

CellCept® 250 mg Kapseln, CellCept® 500 mg Tabletten, CellCept® 1g/5ml Pulver zur Herstellung einer Suspension zum Einnehmen, CellCept® 500 mg Pulver zur Herstellung eines Infusionslösungskonzentrates; **Wirkstoff:** orale Darreichungsformen: Mycophenolatmofetil; i.v.: Mycophenolatmofetil-hydrochlorid, entsprechend 500 mg Mycophenolatmofetil. **Sonstige Bestandteile:** Kapseln: Povidon (K-90), Croscarmellose-Na, Mg-Stearat, Maisquellstärke, Kapselhülle: Gelatine, Indigocarmin (E132), Eisenoxidhydrat (E172), Eisen (II, III)-oxid (E172), Titandioxid (E171), Kaliumhydroxid, Schellack, Maisquellstärke, Kapselhülle: Gelatine, Indigocarmin (E132), Eisenoxidhydrat (E172), Eisen (II, III)-oxid (E172), Titandioxid (E171), Kaliumhydroxid, Schellack. **Tabletten:** Povidon (K-90), Croscarmellose-Na, Mg-Stearat, Cellulose, Tablettenüberzug: Methylhydroxypropylcellulose, Hydroxypropylcellulose, Titandioxid (E171), Macrogol 400, Indigocarmin, Aluminiumsalz (E132), Eisen (III)-oxid (E172), Eisen (II, III)-oxid (E172), Schellack. **Pulver zur Herstellung eines Infusionslösungskonzentrates:** Polysorbat 80, Zitronensäure, Salzsäure, NaCl CellCept® 1g/5 ml Pulver zur Herstellung einer Suspension zum Einnehmen: Sorbitol, hochdisperses Siliciumdioxid, Natriumcitrat, Phospholipide aus Sojabohnen, gemischtes Fruchtaroma, Xanthan Gummi, Aspartam (E951), Methyl 4-Hydroxybenzoat (E218) und wasserfreie Zitronensäure. Aspartam enthält Phenylalanin entsprechend 2,78 mg/5 ml Suspension. **Anwendungsgebiete:** CellCept® ist in Kombination mit Ciclosporin und Kortikosteroiden zur Prophylaxe von akuten Transplantat-abstoßungsreaktionen bei Patienten mit allogener Nieren-, Herz- (nicht i.v.) oder Lebertransplantation angezeigt; bei Kindern und Jugendlichen (2-18 Jahre) nur nach Nierentransplantation und nicht i.v. **Dosierung, Art und Dauer der Anwendung:** Empfohlene Dosis: Nach Nierentransplantation bei Erwachsenen sowohl i.v. als auch oral zweimal täglich 1 g (Tagesdosis 2 g), bei Kindern und Jugendlichen oral zweimal täglich 600 mg/m² (max. Tagesdosis 2 g), nach Herztransplantation oral zweimal täglich 1,5 g (Tagesdosis 3 g), nach Lebertransplantation i.v. für die ersten 4 Tage zweimal täglich 1 g (Tagesdosis 2 g), danach oral zweimal täglich 1,5 g (Tagesdosis 3 g). CellCept® 500 mg Pulver zur Herstellung eines Infusionslösungskonzentrates ist eine alternative Darreichungsform zu den oralen Formen und kann über einen Zeitraum von bis zu 14 Tagen nach der Transplantation eingesetzt werden. Anwendung der Infusionslösung in eine periphere oder zentrale Vene über 2 Stunden (niemals als Bolus); nicht mit anderen intravenös zu verabreichenden Arzneimitteln oder Infusionszusätzen mischen oder mit diesen gleichzeitig durch dieselbe Infusionsleitung infundieren. **Gegenanzeigen:** Überempfindlichkeit gegen Mycophenolatmofetil, Mycophenolsäure oder Hilfsstoffe. CellCept® ist bei stillenden Frauen kontraindiziert. CellCept darf während der Schwangerschaft nicht angewendet werden, es sei denn, der Arzt hat es ausdrücklich verordnet. **Nebenwirkungen:** Zu den häufigeren Problemen gehören Durchfall, Verminderung der weißen und/oder roten Blutkörperchen, Infektionen und Erbrechen. Es sind regelmäßige Blutuntersuchungen durchzuführen, um Veränderungen zeitnah festzustellen. Kinder haben möglicherweise häufiger als Erwachsene Nebenwirkungen wie Durchfall, Infektionen, weniger weiße Blutkörperchen und weniger rote Blutkörperchen. CellCept schränkt die körpereigenen Abwehrmechanismen ein und verhindert dadurch, dass der Organismus die verpflanzte Niere, das verpflanzte Herz oder die verpflanzte Leber abstoßt. Infolgedessen ist der Körper aber auch nicht mehr in der Lage, Infektionen so wirksam wie sonst abzuwehren. Es ist daher möglich, dass Personen während der Behandlung mit CellCept mehr Infektionen bekommen als gewöhnlich, wie Infektionen des Gehirns, der Haut, des Mundes, des Magens und des Darms, der Lungen und des Harntraktes. Wie es bei Patienten, die mit dieser Art von Medikamenten behandelt werden, vorkommen kann, ist eine kleine Anzahl der CellCept Patienten an Krebs des Lymphgewebes oder der Haut erkrankt. Nebenwirkungen, die den Körper allgemein betreffen, könnten Überempfindlichkeit (wie Anaphylaxie, Angioödem), Fieber, Lethargie, Schlafstörungen, Schmerzen (wie Bauch-, Brust-, Gelenk-/Muskelschmerzen oder Schmerzen beim Wasserlassen), Kopfschmerzen, grippeartige Symptome und Schwellungen sein. Des Weiteren können folgende Nebenwirkungen auftreten: **Störungen der Haut** wie Akne, Fieberbläschen, Gürtelrose, Hautwachstum, Haarverlust, Hautausschlag, Juckreiz. **Störungen des Harntraktes** wie Nierenprobleme oder Hamdrang. **Störungen des Verdauungstraktes und des Mundes** wie Verstopfung, Übelkeit, Verdauungsstörungen, Entzündung der Bauchspeicheldrüse, intestinale Störungen einschließlich Blutungen, Entzündungen des Magens, Leberprobleme, Entzündung des Dickdarms, Appetitverlust, Blähungen, Zahnfleischverdickung und Geschwüre im Mund. **Störungen der Nerven und Sinnesorgane** wie Krampfanfälle, Zittern, Schwindel, Depression, Schläfrigkeit, Taubheitsgefühl, Muskelkrämpfe, Angst, Veränderungen im Denken und Gemütschwankungen. **Stoffwechsel-, Blut- und Gefäßstörungen** wie Gewichtsabnahme, Gicht, hohe Blutzuckerwerte, Blutungen, blaue Flecken, Blutdruckveränderungen, anormaler Herzschlag und Verengung der Blutgefäße können auftreten. **Störungen der Lunge** wie Lungentzündung, Bronchitis, Kurzatmigkeit, Husten, Flüssigkeit in den Lungen/Brusthöhle, Probleme mit den Nebenhöhlen. Eine Anwendung in der Schwangerschaft kann zu kongenitalen Missbildungen oder zu Fehlgeburten führen. Packungen: Mit 100 und 300 Kapseln, 50 und 150 Tabletten, 1 Flasche mit 110 g Pulver zur Herstellung einer Suspension zum Einnehmen, 4 Durchstechflaschen mit Pulver zur Herstellung eines Infusionslösungskonzentrates. Preise und weitere Informationen auf Anfrage. CellCept® ist verschreibungspflichtig. **Achtung:** Tabletten oder Kapseln nicht zerbrechen; direkten Kontakt des Wirkstoffes mit Haut oder Schleimhäuten vermeiden, Pulver nicht einatmen. Arzneimittel für Kinder unzugänglich aufbewahren. Stand Mai 2009. Bitte Fachinformation beachten. Pharmazeutischer Unternehmer: Roche Registration Limited, 6 Falcon Way, Shore Park, Welwyn Garden City, AL7 1TW, Vereinigtes Königreich; Lokaler Ansprechpartner: Roche Pharma AG, 79630 Grenzach-Wyhlen.
